STRATEGIC PORTFOLIO MANAGEMENT

SUPPORT DATA-DRIVEN DECISION MAKING WITH STRATEGIC PORTFOLIO MANAGEMENT

Business leaders, enterprise portfolio management office (EPMO) leaders, and IT leaders require a Strategic Portfolio Management (SPM) platform in order to support enterprise-wide strategy-to-execution alignment and adaptation.

Managing a portfolio of projects, programs, products or initiatives at scale while understanding their risks and rewards, the status of execution and expected benefits in an ever-changing competitive landscape isn't easy.

Future fit organizations require an ability to overlay business strategy — a massive, overarching set of objectives, goals, and strategies — to the execution layer of your projects, programs, initiatives, and products. Ultimately, it is critical to success that your organization has the ability to continuously marry strategy, investment, and execution in a world where the business landscape is constantly evolving. With strategic portfolio management, this becomes a reality.

Shibumi's SPM platform helps senior business leaders meet the challenge by providing a unified SPM platform that :

- Provides purpose-built SaaS platform for managing projects, programs, products and initiatives at scale.
- Ensures alignment of activities to the corporate strategic objectives.
- Supports real-time, data-driven decision making.
- Helps leaders to track, measure & forecast benefit delivery.

Strategic Portfolio Management

CENTRALIZE ORGANIZATIONAL SPM DATA

- Shibumi is a single source of truth with real-time visibility to all of your Programs, Projects, Products and Initiatives, with the ability to track both financial and non-financial benefits and optimize for maximum outcomes

OPTIMIZE RESOURCES FOR MAXIMUM IMPACT

- Identify the optimum set of investments to drive the desired business outcome with visibility into resources such as funding, human capacity and IT assets

ENABLE DATA-DRIVEN DECISION MAKING

- Shibumi provides business leaders with the information they need in order to make informed, data-driven decisions such as which initiatives will drive the maximum business benefits and what resources may constrain our success

TRACK DELIVERY OF VALUE

- Gain real-time visibility into the status of initiatives ensuring that stakeholders have visibility to risks and issues that may impact the delivery of expected business benefits

ENTERPRISE SCALE CONTINUOUS OPTIMIZATION

- Ultimately Shibumi unlocks the ability to easily manage 100's or 1000's of initiatives across complex organizational structures. Using Shibumi, stakeholder reporting is automated, ensuring the organization remains agile and focused on the delivery of the program outcomes
