# CREATING VALUE THROUGH DIGITALLY-ENABLED SUPPLY CHAIN OPTIMIZATION

With increasing globalization and changing customer and investor expectations, the supply chain of today looks significantly different from those of the not-too-distant past. In order to unlock cost-savings, revenue growth potential, and supply chain sustainability, CEOs and supply chain executives need to implement some proven changes.

Companies with complex supply chains commonly spend billions annually across thousands of suppliers and can be a significant source of efficiencies. But whilst cost efficiencies are always a key focus, so too is ensuring a supply chain that aligns with the values of your organization such as customer and employee safety or environmental sustainability. Meeting these complex needs is a difficult challenge.

To take a coordinated approach to supply chain optimization companies are turning to agile, digitally-enabled, continuous improvement initiatives at scale to unlock the value of often 1000's of initiatives in the pursuit of optimization.

Shibumi is helping supply chain leaders meet these challenges head-on. The Shibumi Platform equips them to:

- Set Corporate or Program level strategies & objectives
- Identify initiatives from across their organization
- Build portfolios of potential value drivers
- Make optimized investment & consolidation decisions
- Gain visibility & manage the delivery of corporate benefits
- Track, measure & forecast the realization of value

## Digitally-Enabled Supply Chain Optimization

### CENTRALIZE PROGRAM DATA

- Shibumi is a single source of truth with real-time visibility to your Supply Chain Optimization Initiatives, with the ability to track both financial and non-financial benefits

### CAPTURE OPTIMIZATION OPPORTUNITIES

- Source Supply Chain optimization initiative ideas and their business benefits from across the enterprise while ensuring alignment to the corporate level objectives

### ENABLE DATA-DRIVEN DECISION MAKING

- Shibumi provides Supply Chain Leadership with the information they need in order to make informed, data-driven decisions such as which initiatives to invest in and which portfolio of investments will drive the maximum outcome

### TRACK DELIVERY OF VALUE

- Gain real-time visibility into the status of initiatives ensuring that stakeholders have visibility to risks and issues that may impact the delivery of expected business benefits

### ENTERPRISE LEVEL STRATEGY EXECUTION

- Ultimately Shibumi unlocks the ability to easily manage 100's or 1000's of initiatives across complex organizational structures. Using Shibumi, stakeholder reporting is automated, ensuring the organization remains agile and focused on the delivery of the program outcomes
